INTERNATIONAL SPECIALISED EXHIBITION "ROS-GAZ-EXPO"

Dates: October 7-10, 2025

Venue: St. Petersburg, EXPOFORUM Convention and Exhibition Centre, pavilions G and H

For more than 25 years, **ROS-GAZ-EXPO** exhibition has become the main industry event in Russia dedicated to demonstrating achievements in the field of construction, operation and reconstruction of gas transmission systems and gas consumption systems.

Subject:

MAIN GAS SUPPLY

- Design and construction of gas supply facilities
- Gas-using equipment
- Cogeneration units
- Pumping and compressor stations
- Gas turbine engines
- Welding equipment, welding materials
- Equipment for obtaining, storing and using alternative energy sources
- Special equipment

AUTONOMOUS AND RESERVE GAS SUPPLY OF RESIDENTIAL BUILDINGS AND INDUSTRIAL ENTERPRISES

- Units for liquefaction and regasification of liquefied natural gas
- Underground and aboveground tanks
- Evaporation and mixing units
- Equipment for gas boiler houses
- Gas generators
- Control and distribution points
- Storage systems for LNG, LPG, CNG
- Gas filling stations
- Tank units for LPG and LNG,
- Tanks for transportation and storage of LPG and LNG
- Technologies for transportation of liquefied natural gas

ASSOCIATED PETROLEUM GAS TREATMENT FOR GAS SUPPLY TO CONSUMERS

- Gas separation systems and technologies (membrane, adsorption, cryogenic)
- Associated petroleum gas preparation and utilization systems
- Compressor units
- Equipment for associated petroleum gas processing
- Construction and design of ready-made complexes and units for associated petroleum gas processing

OPERATION OF GAS DISTRIBUTION SYSTEMS

- Pipeline fittings for gas
- Equipment for automation of gas transportation and storage processes
- Technologies, materials, equipment for anti-corrosion protection of gas pipelines
- Equipment and technologies for trenchless laying and replacement of pipelines
- Laboratory equipment and analytical instruments. Mobile laboratories
- Mobile industrial and domestic buildings

GAS METERING

- Control and measuring equipment for the gas industry

DIAGNOSTICS

- Technical diagnostics of gas pipelines and gas equipment

INDUSTRIAL SAFETY AND ECOLOGY OF THE GAS COMPLEX

- Labor protection, safety systems and fire-fighting equipment
- Emergency rescue equipment, protective equipment in the field of industrial safety
- Special clothing and personal protective equipment
- Environmental protection, environmental monitoring
- Information technology in emergency situations
- Personnel training
