Results of the ExpoCoating Moscow 2025 exhibition

23rd International exhibition of materials and equipment for surface treatment, coatings application and electroplating

October 21-23, 2025

Russia, Moscow, Crocus Expo IEC

On October 21-23, 2025, the 23rd International exhibition of materials and equipment for surface treatment, coatings application and electroplating ExpoCoating Moscow was held at the Crocus Expo IEC.

This year, 43 leading manufacturers and developers of equipment for electroplating and other industrial coatings, surface preparation and treatment, as well as equipment for wastewater treatment, air treatment and waste disposal after electroplating took part in the exhibition. The products were demonstrated by companies from Russia, as well as manufacturers of equipment and coatings from Belarus and China.

ExpoCoating Moscow exhibitors presented a wide range of products in the sections:

- Equipment and materials for surface preparation and treatment.
- Electroplating equipment.
- Equipment and materials for applying industrial coatings.
- Equipment and materials for wastewater treatment, air purification and waste disposal.

The international composition of the exhibitors was represented by manufacturers from Turkey and China: Elba filter, Changzhou Anjia Coating Equipment Co., Dalian Huate Plastic Powder Co., Hebei Hanna Technology Co.

The exhibitors presented electroplating tapes and power supplies for technological processes; additives for galvanizing, copper plating, phosphating; equipment for applying metal coatings; paint and drying chambers; spraying equipment; machines for washing parts, degreasing, washing components and assemblies; pumps and filtration systems; compact water treatment plants for producing ultrapure water, and There are also protective, decorative and functional electroplating coatings.

Exhibitors reviews:

Runova M.E., Head of the marketing group at BMT LLC:

"We are regular participants of the exhibition, and this year we were amazed by the high level of visitors! Excellent organization, wide geography of participants from Kaliningrad to Krasnoyarsk. Companies such as Rostselmash, Novitek, Arzamas Machine-Building Plant and Belkhimmash LLC from Belarus became interested in our technologies. We are very satisfied! "

Khaliavin D.A., Sales Manager, MANEL LLC:

"A productive exhibition! We have found many new partners for further cooperation. I am glad that the exhibition attracts both new and old customers, whom we met here. Excellent organization, positive attitude and sociable people! "

The hall where ExpoCoating Moscow was held was visited by 6,400 specialists, of whom: 1 500 people were visitors to ExpoCoating Moscow, and 4900 were specialists who came with tickets from other exhibitions of the Intersectoral Technology Week held simultaneously with ExpoCoating Moscow: PCVExpo, Testing&Control, NDT Russia, Heat&Power, GasSuf, FastTec. **Compared to ExpoCoating Moscow 2024, the number of visitors to the exhibition increased by 16%.** In total, 11,755 specialists visited the exhibition halls as part of the Intersectoral Technology Week.

The exhibition's visitors represented leading industrial enterprises from Russia, Belarus, China, Kazakhstan, Azerbaijan, Uzbekistan, Kyrgyzstan, Armenia, Iran, Italy, the Republic of Korea and Turkey. The exhibition in 2025 was attended by directors, leading engineers, electroplating engineers, chemical technologists and heads of departments.

During the exhibition days, visitors were able to get useful practical information at the events of the updated business program of the exhibition:

On October 21, the Technologist's Day was held, during which manufacturers of equipment and materials presented new developments and technologies for industrial enterprises. Organiser: International Exhibition Company MVK.

For the first time at the exhibition, the listeners of the business program had the opportunity to participate in a dynamic **Quiz for technologists.**

Also, on October 21, a round table "Zinc coatings - technologies and applications" was held within the framework of the exhibition for the first time, which brought together experts to discuss the latest achievements and development prospects in the field of zinc coatings.

On October 22, a scientific and practical conference "Physico-chemistry and scientific foundations of technology for the formation of protective and functional coatings" was held.

Organisers: D. I. Mendeleev Russian Chemical Technical University, D. I. Mendeleev Russian Chemical Technical University and International Exhibition Company MVK.

The conference featured expert reports on the following topics:

- Control of the anodic oxidation of aluminum in production conditions.
- Kinetics and mechanism of formation of anode oxide films on titanium-aluminum alloys.
- Functional composites and alloys: physical chemistry and technology of formation.
- Promising areas of development of technologies for deposition of functional conversion coatings on ferrous and non-ferrous metals.
- Electrochemical process of high-speed nickel plating from sulfamate electrolyte. Theoretical patterns and features of practical operation.
- Bio-damage and biocorrosion of silicon under the influence of microscopic fungi.
- Electrochemical process of high-speed tinning. Compositions of electrolytes and features of their industrial operation.

On October 23, as part of the business program, a round table "Modern trends in automation of electroplating plants. Control of coating parameters".

Conference partner: NPO Process LLC.

In addition, this year, prize draws for visitors were held at the exhibition site! Many visitors received useful and pleasant gifts from the raffle partners.

Visitors reviews:

Malyuk S. A., technologist at the Uralmashplant JSC:
I came to the exhibition to get acquainted with the products. We have an electroplating workshop at our factory, and I saw a lot of interesting equipment at the exhibition. I visit here every year, and we use galvanic baths, rectifier units, and accessories in the workshop - everything we find at this exhibition. I plan to attend a business program.

Kurmansky B.B., Technical manager of Prompark Kangaroo PRO LLC:
We came to the exhibition to pick up equipment and materials for powder coloring. We are also considering electroplating. The most interesting thing we saw at the exhibition today is gas dynamic spraying, and we plan to use this equipment in our production to repair machine parts and accessories, so we exchanged contacts. I visit the exhibition every year, and the impression is always very positive.

We would like to express our gratitude to our participants, visitors and partners for their active time at the exhibition. We look forward to seeing you again at the exhibition in 2026! Next year, the exhibition will be held on October 19-21, 2026 at the Crocus Expo IEC.

If your company is interested in participating in ExpoCoating Moscow 2026, take advantage of early booking opportunities until December 12. If you have any questions about participation with the stand, please contact the organizing committee of the exhibition:
